## TABLE OF CONTENTS

## Think Smarter, Think Isinglass

For all of your food service presentations, buffet, and banquet needs

### **Dear Prospective Client,**

Thank you for the opportunity and privilege to introduce our company to you.

Isinglass, Inc. is a premiere USA manufacturer of very high quality banquet, buffet and tabletop presentation ware. We offer innovative and creative solutions to meet the rigorous standards of the Hospitality Industry. Our products are made from 100% recyclable and reusable glass, wood, steel and quartz. Because our products are made in the USA, we have faster delivery times. We provide banquet, room, accent and lobby tables, as well as buffet ware for all types of venues including: hotels, convention and conference centers, arenas, stadiums, clubs, bars and pool areas. We were among the first to introduce "skirtless" banquet tables to the industry, resulting in huge savings opportunities for our customers.

All of our glass products are commercial grade architectural glass, kiln-formed and individually slumped into the mold. Our meticulous methodology involves long firing sequences as well as proprietary computer controlled holding and cooling processes. This highly controlled system allows for maximum strengthening and hardening of the glass. The result is strength and durability that is unmatched by any of our competitors.

We are confident that you will be pleased not only with the quality products Isinglass provides, but with our unique array of offerings. Many of our designs are one-of-a-kind, allowing you to create a presentation that will "wow" your clientele.

As a company, we will continue to strive to stay in the creative forefront of the market by providing you with designs and products that will inspire and build on your creativity.

We look forward to serving you in the near future.

### The Isinglass Team

singlass

## **Defining The Isinglass Difference...**

- Isinglass products are "Proudly Made In The USA"
- When you choose to use glass, wood and/or steel, you're choosing a product that is environmentally friendly, 100% recyclable and reusable.
- Because our products are made in the USA, we have faster delivery times
- We offer textured glass, solid wood and quartz table tops, giving you greater creativity and flexibility, to meet all of your design needs.
- Custom opportunities available
- Our products are specifically designed for the hospitality industry. You'll get the hospitality strength you need and the designer look you want.

The slumping process we use for our glass creates a beautiful sealed texture, making fingerprints virtually invisible.

## Essentially a No-Maintenance Product!

We Provide Furniture and Buffet Ware For Hotels, Rooms & Suites, Lobbies, Banquet Facilities, Convention Centers, Arenas, Stadiums, Restaurants, Clubs, Bar & Pool Areas, Catering and €Special Events

# Glass Quartz Wood Steel

## **Embrace The Eco-Friendly Revolution**

- Glass is made from pure, sustainable raw materials
- Isinglass does not use resins or plastics in our kiln forming process
- Cambria quartz is a low-emitting product, making it incredibly safe for the environment and indoor use
- Like glass, wood and steel, quartz is a natural material that can be broken down in the environment
- Wood is recyclable, biodegradable and durable. Nature's own renewable natural resource.
- Steel is recyclable and energy efficient
- Unlike many other materials, steel can be recycled an infinite number of times without loss of product quality
- Tables without skirting translates to less laundry and storage costs
- Save money and the environment

When you choose to use glass, quartz,wood and/or steel you're choosing a product that is environmentally friendly, 100% recyclable and reusable

Glass . . . Wood . . . Steel . . . Quartz

An Environmental Bonus!

Proudly Made In the USA

#### **REFERENCE - PRODUCT CARE**

#### Isinglass Glassware

- Though most products are dishwasher safe, we recommend you hand wash with a mild liquid dishwashing detergent using a non-abrasive cloth or sponge. Rinse thoroughly in warm water. Dry with a soft cloth.
- Glassware is safe to place in freezer for short periods of time. It is **not** to be used for freezing foods
- Avoid carving and/or cutting directly on product with sharp or serrated utensils, as you may scratch the surface.
- Do not put in microwave.
- Do not put product in oven or broiler.
- · Do not expose glassware to a direct flame.
- Do not pour boiling liquids directly onto the product.

## Cambria Quartz

- Clean periodically using a cloth dampened with warm water; use mild soap if desired.
- Quartz is not heat proof, chemical proof or fracture proof. Be aware of damaging exposure to these potential damaging acts upon your Cambria.
- · Do not expose quartz to bleach.
- Do not expose quartz to any type of chemical cleaner (i.e.: Comet, Soft Scrub, etc.)
- Do not apply any topical treatments to quartz surface for any reason.

#### **Disclaimer:**

Glass will break if not used or taken care of properly. Please use caution, as you would with any glass product.

Manufacturer/supplier is not responsible for cuts or injuries sustained due to breakage.

Glassware is not warranted against breakage.

## Wood

- · Dust frequently
- Occasionally clean with a damp cloth. Dry immediately with a soft cloth.
- · Blot spills immediately.
- Use protection when placing items of hot or cold temperatures on furniture surfaces.
- Keep ammonia, solvents or alcohol away from furniture surfaces.
- · Not intended for outdoor use.
- Do not clean with soap and water.
- Do not leave liquids on wood.
- · Do not place wood in direct sunlight.
- Do not expose wood to extreme changes in temperature or humidity.

#### Metal

- Clean periodically with a slightly damp cloth. Dry thoroughly.
- Do not use harsh, abrasive or strong detergents to clean.
- · Do not use outdoors.

#### **Please Note:**

All sizes are approximate

MS - Mild Steel

SS - Stainless Steel

**BSS - Brushed Stainless Steel** 

ø - Diameter

**Return Policy For Glassware:** 

In all cases, a Return Authorization must be obtained from customer service. (317-815-5590)

Policy available online or upon request

# ISINGLASS...THE OBVIOUS CHOICE What Sets Isinglass Apart?

#### DURABLE

We use architectural glass that is hand-cut, kiln-formed and individually slumped into the mold.

Isinglass is fired with computer controlled heating sequences, hardening the glass and increasing durability.

Each firing sequence is approximately 16 hours - allowing for maximum strengthening and hardening of the glass. After firing and cooling, each piece of glass is carefully inspected for flaws and imperfections prior to packaging.

#### **DESIGNER LOOK**

This long firing sequence allows our skilled craftsmen to control the rising temperature, the holding temperature and the cool down process. These steps ensure that the glass properly hardens and maintains its brilliance and clarity.

Our textured glass reflects any available light source - natural or candlelight - and presents a stunning table setting.

#### **QUALITY**

Isinglass is chip resistant.

Our slumping process creates a beautiful texture that not only enhances the look of the glass, but camouflages fingerprints and any scratches you may accidentally get as well, thus expanding the life of the product.

#### **ECO-FRIENDLY**

All raw materials used (i.e.: molds, paints, texturing and bonding materials) are sourced from the finest facilities in the industry, thus ensuring a consistent and reliable product.

#### **INNOVATIVE DESIGNS**

Isinglass offers an array of unique, fresh and upscale designs created especially for the Hospitality Industry. From our distinctive serving pieces to our stunning banquet table selections, all occasional and accent tables, beautiful back bar and full bar options - you are sure to find the perfect pieces for your venue. Isinglass provides you with a multitude of choices, so you never have to settle for anything less than what you really want. **Style, Versatility and Durability - Designed With You In Mind.** 

## **REFERENCE - WHY GLASS?**

Innovative & Fresh Designs
Hospitality Strength
Versatile
Functional and Durable
Unmatched Quality
Designer Look

## **REFERENCE - WHY WOOD?**

#### **Wood Tables and Tabletops**

- · Stylish and carefully handcrafted.
- Transition beautifully from banquet furniture to stunning decor pieces.
- · Sleek, elegant designs.
- Our wood tables and table tops are solid wood.
   They are beautiful, sturdy and resilient.
- · Wood is nature's "green" gift to us.
- · Wood is recyclable and renewable.
- Solid hardwood products can last a lifetime, if cared for properly.

#### **Functional and Versatile**

Warm, Rich Colors and Designs

Simple, Classic Elegance

## Bring the Outdoors Inside With the Warmth of Nature's Hardwood

#### **Solid Hardwoods**

We use solid American Hardwoods. Woods from deciduous trees such as walnut, mahogany, cherry, oak, and teak are called hardwoods. These trees take longer to grow and are usually more expensive than soft woods as a raw material. Their tighter grain makes them harder, so they resist denting more than soft woods do. They are characterized by a fine, compact grain, durability and heavy weight, which makes these woods ideal for furniture construction.

- ∼Solid woods have the advantage of being easily refinished, should the need arise.
- ∼Solid wood is considered to be top quality, beautiful, sturdy and resilient.

#### Quality

Our solid wood tables and tabletops are built to last. Building to last involves more than just the right wood that's been properly prepared - it involves a lot of knowledge, patience, and commitment. It involves craftsmen who take pride in their work. You will find the stability and integrity of the construction of our wood products to be the real McCoy.

- ~Quality is first and foremost
- ~Attention to detail that goes far beneath the surface

#### Nature's Naturally "Green" Gift To Us

It would be difficult to find a resource that is more sustainable, more natural or more beautiful than American Hardwoods. By choosing an eco-friendly product like wood, you are minimizing the impact on the environment throughout all the stages of the products life cycle, from extraction, through processing, use, reuse and final disposal.

- Forests and trees are a renewable natural resource.
- ➤ Wood is recyclable, biodegradable and durable often lasting for centuries.
- ∼ Advanced technology and manufacturing processes ensure efficient use of wood by-products.
- → Solid hardwood products can last up to 125 years or longer creating a long life cycle.

#### Uniqueness

In our experience throughout the years, it is crucial to know some of the following points about wood furniture.

- ➤ No two pieces of wood are exactly the same because it is a product of nature. With this in mind, you must
- Expect variations in colors and wood grain.
- ➤ Wood will expand and contract because of retaining a certain amount of moisture.
- ∼ Plank tops will show offsets at the tongue and groove joints depending on the humidity. This is a normal.

### **REFERENCE - WHY QUARTZ?**

## Maintenance Free Polished Finish

Scratch, Stain and Heat Resistant

#### **Cambria Quartz Tabletops**

- Quartz is one of the hardest stones found in nature; this product is incredibly durable.
- Cambria is certified by NSF as safe for use as a food preparation surface.
- Its nonporous surface resists absorption of moisture and food materials, which can harbor harmful bacteria.
- Cambria uses only the best raw materials available to make their quartz, making sure that the product you receive is of the highest quality.
- Quartz is naturally green and suitable for the environment.

## **REFERENCE - WHY QUARTZ?**

Certified for food use

Available in a wide variety of colors

Maintenance free polished finish

For our customers who desire a natural stone look - Isinglass now exclusively offers the option of Cambria Quartz

The market is inundated with companies offering quartz, marble and granite

So Why Did Isinglass Choose To Offer Cambria Quartz Exclusively?

Like our glass and wood tops, Cambria quartz meets our meticulous standards

Non-porous and nonabsorbent

Naturally green

Top quality

Scratch, stain and heat resistant

#### **REFERENCE - FAQ'S**

Q: Does the price of a table change if I want it made in a custom size that is not listed as "standard?"

**A:** It depends on the amount of customization requested. Customization that is very detailed can definitely add to the cost. All pricing is based on dimensions, materials required, plus man hours for manufacture.

Q: What is the approximate load capacity for casters?

A: Up to 175 lbs / caster

Q: What is the approximate load capacity for wheels?

A: Anywhere from 300 lbs - 600 lbs, depending on application. (Tables with quartz tops, Back Bars)

Q: How do I know whether to choose wheels or casters?

**A:** Casters are ideal for lighter weight tables and offer a less commercial/industrial look. For heavier application, such as Back Bars, serving stations and tables with quartz tops, we suggest using wheels. Wheels used on these products will increase ease of movement at higher weight requirements.

Q: Why should I buy quartz tops, rather than granite?

**A:** Quartz is just as durable as granite, but is <u>much more versatile and practical.</u> Quartz is <u>non-porous and never needs to be sealed</u>. Granite is a porous stone and needs to be sealed regularly with a chemical treatment. Quartz is NSF certified for food use, making it incredibly beneficial for use within the hospitality industry.

Q: What are the differences between a flush table top, a recessed table top and an overhanging table top?

A: Each style has a slightly different look and feel. Read below to determine which style is best for you.

- (1) Flush table tops sit on top of the frame, lined up with the vertical edges of the frame. With flush tops, there is more usable surface area and cleanup is faster. \*Flush tops are an 1/8 inch shorter than the frame itself and need to be properly lined up to the edges of the table top when being installed. Flush tops are the most requested style.
- (2) Recessed table tops are set down <u>inside</u> of the table frame. These tops have more protection against every day use, since they are nestled within the frame. One drawback that comes with the recessed style is that cleanup can be more time consuming. Liquids and food debris may fall within the space between the frame and the glass, making cleanup more of a hassle at times.
- **(3) Overhanging table tops may extend past** the frame 1" to 6", depending on the customer's requirements. We **do not recommend** the use of overhanging tops on table frames with wheels or casters, due to increased likelihood of damage. This table top style works best on fixed tables.

**Q:** What is the general lead time on Isinglass products?

**A:** Our normal lead time is <u>4-6 weeks</u> of the receipt date of the Purchase Order and deposit. However, it's best to call our offices to confirm lead time, as it can change due to the size of the order and the number of orders ahead of yours. Please note that because our products are made to order, **all orders requiring deposits are not** put into the production queue until the **deposit is received**.

Q: What is Isinglass' most popular table style and why?

**A:** Our most popular table styles are the **Aries** and the **Londons**. These tables offer more flexibility because their styles lend themselves to either having casters/wheels or going without them. The Aries and Londons can more easily conceal the casters/wheels, making them more aesthetically pleasing, while at the same time giving the option of mobility. The **Aries** line in particular is popular because of the array of sizes and shapes available. It is easy to create multiple looks and banquet layouts with this popular line of tables.

## **REFERENCE - FAQ'S**

Q: Why does the clear glass have a green tint?

**A:** The tint occurs from the iron in the glass. It is most apparent when viewed from the edge and becomes more visible as the glass thickness is increased.

Q: What is Ultra Clear Glass and do you use it for your serving pieces or your tabletops?

**A:** UltraClear glass is manufactured with reduced iron content - low iron glass is clearer. We do not use the ultra white glass for manufacturing our product. Our textured glass enhances the look of the glass, while at the same time camouflaging any fingerprints, nicks or scratches that you may accidentally get. Textured glass reflects any available light source - natural or candlelight - and presents a stunning look for your venue.

Q: What is your sample policy?

**A:** Due to the high expenses of our products, we <u>strictly</u> provide small samples of our quartz, textured glass and powder coating options. Samples of larger items, such as tables, displays, and serving pieces will not be provided.

Q: What is your return policy?

**A:** Product should be opened immediately upon receipt and inspected for breakage or any imperfections. Any discrepancies should be reported to Isinglass immediately. If product is accepted and we receive no notification within 15 days of receipt of product, then Isinglass assumes the product has been received in good condition and that customer has no issue with product or product order (quality, quantity, sizes, etc.)

Prior to return, authorization must be obtained from Isinglass. Authorized returns include:

- product defective due to manufacture, workmanship or materials
- product damaged during shipment
- product shipped in error
- customer returns

#### Returns must meet applicable criteria as outlined below:

#### **Criteria Details:**

In all cases, a return authorization must be obtained from isinglass customer service, 317-815-5590. Product must be returned within 15 days of return authorization date, or return authorization is null and void.

## Product defective due to manufacture, workmanship or materials is returnable within 30 days from receipt of product.

- in the case of defective product, return shipping fees will be paid by isinglass.
- defective product must be returned within 15 days of return authorization date, or return authorization is null and void.
- replacement product may require an additional 4-6 weeks for custom order product to be re-shipped and delivered if not in stock.

#### **Product damaged during shipment**

- the shipping company will be responsible for damage costs incurred during shipment.
- please examine product prior to signing shipper's release. Once product is signed for, you have accepted liability for the product.
- do not accept delivery if product is obviously broken during shipment, ie., the box sounds like broken glass when shaken. Please document condition of package received, including photos if possible, for the shipping company.
- replacement product may require an additional 4-6 weeks for custom order product to be re-shipped and delivered if not in stock.

#### **REFERENCE - FAQ'S**

#### **Product shipped in error**

- upon receipt of product shipment, all items should be examined upon receipt to confirm condition, correct count, quality, color, size, etc.
- return shipping fees for product shipped in error by isinglass will be paid by isinglass.
- product must be returned within 15 days of return authorization date, or return authorization is null and void.
- replacement product may require an additional 4-6 weeks for custom order product to be re-shipped and delivered if not in stock.

#### **Customer returns**

- items ordered incorrectly by the customer must be reported to Isinglass within 15 days of receipt along with a description of the correct product to be ordered.
- the return of items ordered incorrectly by the customer must be approved by Isinglass and assigned a return authorization number.
- the return to stock fee is 25% of the return, plus all shipping costs to return the product; returns of this nature must be shipped freight prepaid by the customer.
- product must be returned within 15 days of return authorization date, or return authorization is null and void.

#### **Unacceptable returns**

- custom orders may not be returned.
- returns without a return authorization will not be accepted
- product damaged by the customer after receipt of product

#### **Metal Table Frame Warranty**

All Metal Table Frames are guaranteed against defective material and workmanship for a period of one (1) year from date of purchase. We will repair or replace at our option any product we determine to be defective as a result of faulty material or workmanship. In no event shall our liability under this warranty exceed the purchase price of the product determined to be defective. We **will not** repair or replace at our cost any product which has been altered, subjected to misuse, negligence, accident or used in any way other than originally intended for our product. For the purposes of this warranty, normal wear to the product finish shall not be considered a defect.
