A

A Guide to Our Pizza Trays

A) Aluminum Pans

Aluminum pans are available in two weights. Standard Weight pans are 18 ga., .040", 1 mm aluminum and Heavy Weight pans are 14 ga., .064", 1.5 mm aluminum; Heavy Weight pans are 50% heavier than Standard Weight. Standard Weight pans are usually designated with an "A" as either the prefix or suffix in the item number and Heavy Weight pans are usually designated with an "HA" as either the prefix or suffix in the item number. Hand wash is recommended as aluminum is a soft metal that is attacked by detergents with a high alkaline or acidic nature. Hand wash with detergents made specifically for aluminum. Through repeated use aluminum will soften and if scoured, will thin.

Aluminum Pan

B

B) Tin Plate Pans

Tin Plate should be seasoned before use and may need periodic reseasoning. Tin Plate will darken with use and will rust if refrigerated, soaked in water or left unseasoned in damp environments. Wipe dry immediately after hand washing. Tin Plate pans are designated with a "T" as either the prefix or suffix in the item number.

To Season Tin Plate Pans

To season, wash in warm, soapy water and quickly dry. Brush oil on inside and outside surfaces of the pan and bake to a golden or dark brown. When seasoning, bake at regular times and temperatures. Some pans may need a second or third coating before being fully seasoned.

C) Hard Coat Pans

Hard coat pans are made from Heavy Weight aluminum. Perf and SuperPerf hard coat disks are made from Standard Weight aluminum. Hard Coat pans are usually designated with an "HC" as either the prefix or suffix in the item number. Hard coat anodizing is a synergistic electro-chemical process that converts the surface of aluminum into aluminum oxide. The aluminum oxide is a dark color. This finish is hard and will not flake off. However, the aluminum underneath is soft and through repeated use the pan will soften. If scoured, the pan will thin. Hardcoat pans are not non-stick and must be seasoned. Hand wash only.

To Season Hard Coat Pans

Wash and dry the pan thoroughly, wipe oil on the inside and outside surfaces of the pan, and allow to soak in for 30 minutes. Then bake at regular cooking times and temperatures. Do not over bake and do not wash off excess oil, just wipe. The oil residue, and any additional oil added before baking, allows the pan to develop non-stick properties. Remember when cleaning hard anodized aluminum, this is considered an amphoteric coating and will be attacked by solutions of a high alkaline or acidic nature. Do not expose these pans to dishwashers or caustic cleaning solutions. Hand wash with detergents made specifically for aluminum.

Please note:

In our catalog are thousands of different pizza trays and tens of thousands of different combinations of styles, depths, materials and options. **These pans are made to order; they are not stocked.** It is possible that your special order pan has never been made previously or has only been made once or twice. **Consequently, special order pans, once ordered, cannot be cancelled or returned.** Please review and re-confirm the tray you are ordering. If you have any questions, please call and, if necessary, request a sample. **Orders for special order pans cannot be cancelled. Special order pans are not returnable.**

Hard Coat Pan

D) Nibs

Any round or square pizza tray or pan we manufacture, 2" (5.1 cm) deep or less, up to 20" (50.8 cm), can be furnished with Nibs. To order, use the regular item number and add the prefix "N." Also note in the body of the order that the pans should be made with Nibs. The Nibs are approximately 5/8" (15.9 mm) diameter and raise the pizza about 1/8" (3.2 mm) above the surface of the pan. Raising the pizza off the surface allows moisture to escape and a fresher, crispier pizza may result. Pans with Nibs cannot be Perf or SuperPerf. Refer to the tray or pan style for more information and for pricing information.

E) Perf

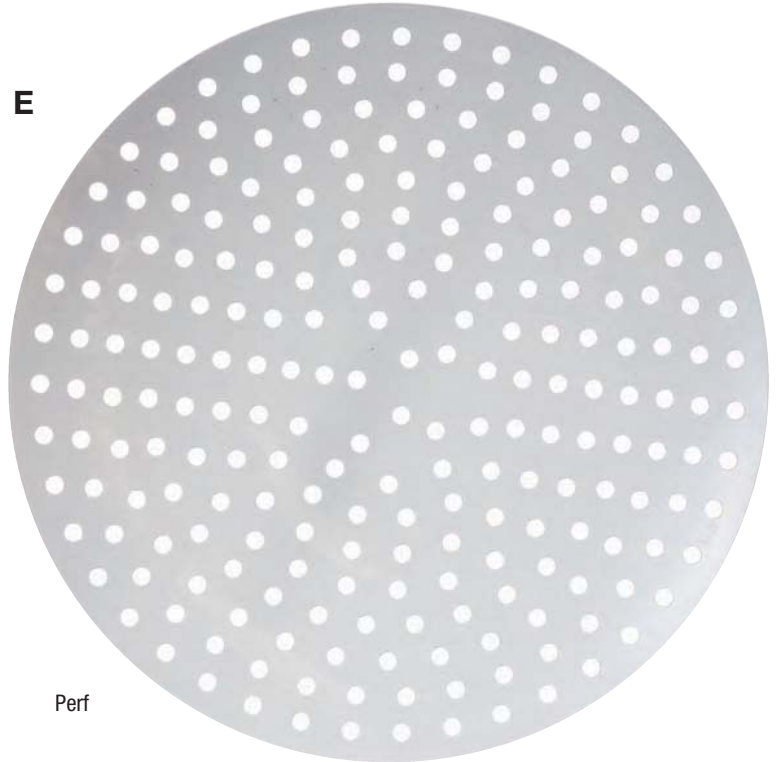

Any round or square pizza tray or pan less than 21" (53.3 cm) in diameter can be Perforated. To order, use the regular item number and add the suffix or prefix "P." Also note in the body of the order that the pans should be Perforated. These pans cannot be made with Nibs. Perf pans allow the bottom of the pizza to cook faster and can provide a crispier crust. Perf pans can also be used to keep cooked pizzas fresher by allowing moisture to escape. Refer to the tray or pan style for more information and for pricing information. All holes are 3/8" (9.5 mm) diameter.

F) SuperPerf

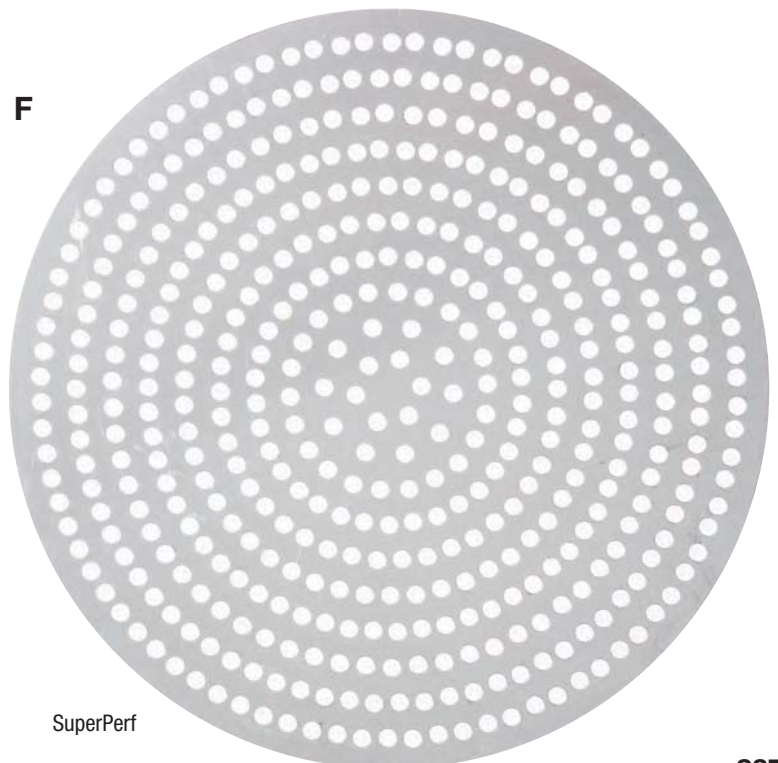

Any round pan less than 21" (53.3 cm) in diameter can be SuperPerf. To order, use the regular item number and add the suffix SP. Also note in the body of the order that the trays or pans should be SuperPerf. These pans cannot be made with Nibs. For the same diameter, SuperPerf pans have twice as many holes as Perf. SuperPerf allows the bottom of the pizza to cook faster and can provide a crispier crust. SuperPerf can be used to keep cooked pizzas fresher by allowing moisture to escape. All holes 3/8" (9.5 mm) diameter. Refer to the tray or pan style for more information and for pricing information.

Mega CAR Pan

B) Mega Screens - Aluminum 

The only pizza screens tough enough to exceed the high standards of NSF, Mega Screens are the smart choice. Holes and open rims make cleaning a breeze and improve food safety. Available in aluminum or hard coat anodized aluminum, Mega Screens can last 5 to 10 times longer than standard pizza screens. Hard coat Mega screens are the most durable, cost-effective screens for conveyor oven use. Holes are 3/32" (0.24 cm) diameter.

A) TP Series Wide Rim Pans 

There's a reason why other pizza supply manufacturers imitate, but never duplicate American Metalcraft's product line. When it comes to durability and reliability in pans, American Metalcraft offers the best value. The TP Series of Pizza Pans is manufactured from heavy duty 14 and 18 gauge aluminum. These gauges of aluminum contribute significantly to a longer life. With so many styles and sizes from which to choose, American Metalcraft has built a solid reputation as a quality manufacturer for the pizza industry since 1947.

B) CTP Series Coupe Style Pans 

Just like the TP Pizza Pans, these CTP Pans are manufactured from the finest grade of aluminum. It's really pretty simple. The harder materials used in our pans last longer than less expensive alternatives in the marketplace.

D) 7000 Series

7000 Series are stacking covers for DEP, 2000 and 9000 pans, covers for the top of a stack for 5000 and 5100 pans, or as covers only for 4000 and 8000 pans. Only tapered pans can be made to stack with 7000's.

If you know the AM item number of your pan, look for it on the list. If you don't know the number, measure the top inside diameter of your pan and find the 7000 series cover with the largest smaller ID.

Wood Peels and Boards should be wiped with a damp cloth. Never soak with water!

Pizza Peel Wood Oil

Wood pizza peels should never be used under heat lamps or soaked in water. If necessary they can be seasoned or sealed with oil. To seal, wipe any food safe oil (like mineral oil) on the surface of the peel. Some oils will eventually go rancid; these oils should be avoided. If sealed, the peel is less likely to pick up unwanted odors, food particles and moisture. This will not increase the life span of the peel. Peels eventually wear out. If peel warps, leave overnight with the warp facing up and it should flatten out. Avoid leaving on hot surfaces, which could increase chance of warping. Pizza peels are not dishwasher-safe.
